Action Plan 2016

Who we are

The Coastal Partnerships Network (CPN) is a voluntary, not for profit umbrella body, formed in 2006, that exists to encourage the exchange of information and debate between around 80 Coastal Partnership Officers representing the local coastal partnerships

CPN promotes the value of the work of Coastal Partnerships (CPs) to their supporting partners, other coastal stakeholders and relevant initiatives including policy development. It also offers increased opportunities for learning and influence, strengthening and supporting Coastal Partnership Officers (CPOs) in their work.

CPN believes in and supports Integrated Coastal Management and is working to facilitate a joined up approach to the management of coastal areas and to represent coastal partnerships at regional, national and European levels.

CPN is run by a small voluntary committee. Current committee membership is listed on page 9.

What we are doing

At the 10th CPN Annual Coastal Forum held in Bristol in November 2015, a strong mandate was expressed for CPN to continue with a clear message that there was a real need for CPN and an opportunity for CPs to develop their role and services and become pivotal in the future management of our coast.

The Action Plan

Actions are divided into three main work areas:

1. Outward-facing activity Page 3
2. Internal business activity Page 6
3. Resources Page 8

Under each section is a range of tasks. Each task may meet one or more of the aims of the CPN, which are listed below.

Aims of the Coastal Partnerships Network:

1. *Representing coastal partnerships and their interests at regional, national and European levels*
2. *Increasing the representation of the value of the work of Coastal Partnerships to their supporting partners, other coastal stakeholders and relevant initiatives including policy development*
3. *Facilitating a joined up approach to the management of coastal areas*
4. *Providing opportunities for learning and influence, strengthening and supporting Coastal Partnership Officers in their work*

The aims being met are noted by a numerical reference in each task.

Priorities are noted under each task, as low, medium or high.
